SUBJECT: Designation of Programs for Director, Operational Test and Evaluation Oversight

References: (a) 10 U.S.C. § 139
(b) 10 U.S.C. § 2366
(c) 10 U.S.C. § 2399
(d) DoD Instruction 5000.02, "Operation of the Defense Acquisition System,"
August 10, 2017

In order to effectively advise the Secretary of Defense, the Under Secretary of Defense for Research and Engineering, and the Under Secretary of Defense for Acquisition and Sustainment on operational and live fire test and evaluation (LFT&E) in the Department of Defense in accordance with reference (a), this memorandum provides the criteria and rationale to add and remove programs from Director, Operational Test and Evaluation (DOT&E) oversight. The resulting list of programs will focus test and evaluation resources on delivering combat credible weapons, equipment, and munitions.

DOT&E will actively monitor acquisition programs using criteria for operational test and evaluation (OT&E) and LFT&E outlined in references (a), (b), and (c). To determine the need for DOT&E oversight, the following will be considered:

- Program exceeds or has the potential to exceed the dollar value threshold for a major program, to include major defense acquisition programs (MDAP), designated major subprograms, as well as highly classified programs and pre-MDAPs.
- Program has a high level of Congressional or Department of Defense interest.
- Weapons, equipment, or munitions that provide or enable a critical mission warfighting capability or is a militarily significant change to a weapon system.

Additionally, DOT&E will monitor acquisition programs and consider the following to determine when programs should be removed from DOT&E oversight:

- Test and evaluation (initial and follow-on OT&E and/or LFT&E) is complete and associated reporting to inform fielding and Full-Rate Production decisions is complete.
- Program development has stabilized and there are no significant upgrade activities.

Attached is the updated unclassified DOT&E oversight list that implements the criteria above. Based on these criteria, DOT&E will continuously review and update the oversight list and notify the Services accordingly. The unclassified DOT&E oversight list does not include highly classified programs that are subject to DOT&E oversight. Oversight of such programs will be identified directly to the Services.

Unless otherwise noted, the test-related documentation specified in reference (d) will be required for all programs on the oversight list. DOT&E will consider tailoring test-related approval, documentation, and reporting requirements as appropriate for each program.

This memorandum replaces all previous memoranda on oversight list designation and reporting.

Robert F. Behler
Director

OSD DOT&E Working Oversight List - Program Notes

Title	MDAP Note
1	MAIS Program; no BLRIP report required.
2	BMDS elements will enter the formal DoD acquisition cycle at Milestone C, concurrent with Service procurement responsibility transfer. BMDS elements are exempt from DoD 5000 series requirements until they transfer. They are not exempt from Title 10 requirements.
3	Includes Programmable Air-Burst Munition (PABM)
4	3DELRR - Program designated "Special Interest" by AT&L ADM dated 27 Feb 09
5	BMDS including the following sub-programs: Command, Control, Battle Management, and Communications (C2BMC), Aegis Ballistic Missile Defense (Aegis BMD) and SM-3 all Blocks, Ground-based Midcourse Defense (GMD), Terminal High Altitude Area Defense (THAAD), all BMDS Sensors, Airborne Laser Testbed (ALTB), Precision Tracking Space System (PTSS), and Airborne Infrared (ABIR)
6	LCS Live Fire oversight includes ship survivability and the lethality of the NLOS-LS, 57mm ammunition, and 30mm ammunition.
7	LPD 17 Live Fire oversight includes ship survivability and the lethality of the 30mm ammunition.
8	Testing of system under oversight will include analysis and evaluation of the contribution of supporting sub-systems.
9	DDG1000 Live Fire oversight includes ship survivability and the lethality of the LRLAP, 57mm and 30mm ammunition.
10	Each affected platform must submit a TEMP to address integration of the armor into that system.
11	The KC-130J Live Fire program was begun post-production in coordination with the KC-130J PMO.
12	Due to the unique nature of weaponizing this mostly logistics platform we are closely watching the specific challenges of the Harvest Hawk (HH) concept. HH should be contained in the KC-130J Navy section of Annual Report.
13	Dec 2010 ADM established GH B30 as separate ACAT I program. RQ-4A aircraft will be retired in FY 11-12.
14	AH-1Z and UH-1Y are components of the H-1 Upgrade program and are listed separately to capture testing for each airframe.
15	Requirement for operational Joint C2 capability remains. DOT&E early involvement in AoA efforts is providing means to determine GCCS FoS impact and T&E way ahead.
16	Designated Major Sub-Program of CVN 78 by FY '12 NDAA.
17	Program includes current and planned improvements to the AN/SSQ 125 active source buoy, AN/SQQ101 receive buoy, and aircraft avionics operational software for MAC planning and tactical employment. Program supports mission capability as a replacement for the current fielded Improved Extended Echo Ranging System and the P-8 aircraft Increment II program.
100	DOT&E Special Interest (temporary flag)
18	CV-22, MV-22, and CMV-22 are components of the V-22 program and are listed separately to capture testing for each airframe.
19	This program has both Air Warfare (AW) and Land and Expeditionary Warfare (LEW) coverage for Operational Test (OT).
20	Joint Tactical Radio System, Handheld, Manpack, and Small Form Fit (HMS)[Manpack/Leader Radio] is the program of record. HMS Leader Radio and HMS Manpack are listed separately to capture the different testing for each radio.
21	Adequate OT&E requires operationally representative integrated testing between Space Fence Inc 1 and the JMS SP 11.

OSD DOT&E Working Oversight List - Program Notes
